Body balance test

The geopathies reduce the balance ability of the body, than the correct distribution of the body weight on the feet.

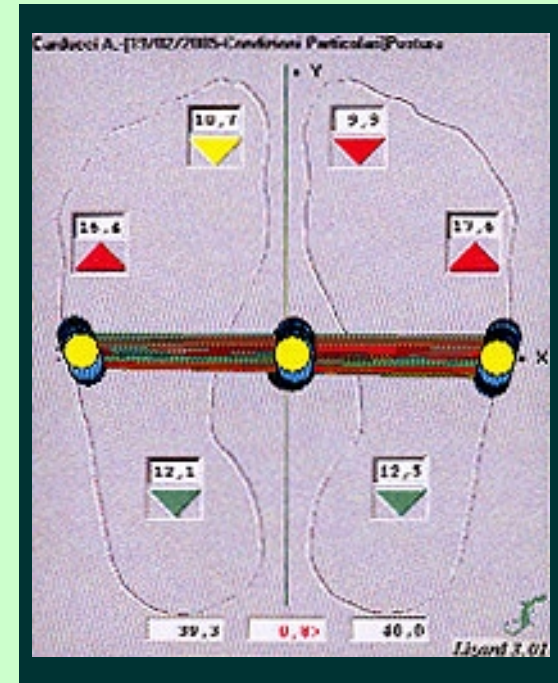

Test over a radiations source

Unbalance by side of 4,7 Kg.
Very confused oscillation on the right side of the body

Test out from the radiations source

Lower level of unbalance from 4,7 to 2,9 Kg.
Little oscillation less confused on the right side of the body

Test over the above radiations source shielded by Geo.De.

Unbalance reduced to 0,8 Kg.
Less difference between the points pairs.
The oscillation on the right side of the body is nearly disappeared
